

ASSET VISION® SERVERS OVERVIEW

# Quickly identify server license and maintenance cost savings through a unified cloud service

Agentless server discovery provides inventory, normalization and transaction detection with dependency mapping in a single solution. It swiftly enables accurate reporting on waste through server application usage and precisely identifies unused and underutilized hardware and software.

## Service Description

Asset Vision Servers is a subscription based, IT asset usage and management service for servers delivered through a secure cloud architecture. It collects the consumers and providers of services and the programs behind the service including all know common services such as web and SQL server.

## Key Functionality

**Comprehensive Baselines.** Full discovery of all Windows, OS X, Linux, Solaris, AIX and HP-UX servers on physical and virtual machines with all device attributes.

**No Agent Required.** Advanced, innovative discovery techniques enable comprehensive hardware and software data to be gathered.

**Service Dependencies.** Asset Vision incorporates discovery of devices that host services for use by other devices, and the discovery of devices that use these services without the use of an agent.

**Cluster Support.** Asset Vision Servers includes capabilities for capturing information on computer clusters. This includes failover and workload balancing clusters.

**Virtual History Tracking.** Virtual to physical relationships and VM movement history for ESX clusters. This includes ESX Cluster Members, Nodes by Cluster Type, Windows Clusters, Cluster Nodes Locations and Licensable services.

**Scalability.** Works across heterogeneous platforms in a single scan without a loss of performance.

**Fully Integrated with Asset Vision Suite.** Provides an accurate and complete inventory of all IT assets.

**Server Utilization.** Gathers specific SQL Server configuration and utilization information to see, in one location, all the information needed to understand exactly SQL

## About Scalable

Founded in 2008 Scalable Software Limited is a leading supplier of innovative IT Asset Management software. Scalable's IT Asset Management solutions aim to assist IT Asset Managers and Software Asset Managers reduce compliance risk, minimize waste and cut costs. For more information:
