

ASSET VISION® TRAINING SERVICES DATA SHEET:

The Right Training for the Right User - Ensure Maximum Productivity

Scalable's Training Services cover all aspects of the use and maintenance of Asset Vision to ensure your users are as productive as possible and to help you gain maximum value from your investment.

Whether it is initial training to support the first-time user community, or refreshing your team's knowledge after staff transitions, the training programs can be designed to meet your specific needs. Training can also be essential in the familiarization with new features that Scalable provides as part of its routine updating of your instance.

Scalable's training portfolio covers all the modules of the Asset Vision solution.

As industry experts, we apply our experience, coupled with unique insights into Asset Vision, to make sure we deliver the most effective training experience.

Courses are interactive and hands-on to ensure the most effective learning.

Training Ensures You Will Maximize the Value of Your Technology Investment

Training is an invaluable part of any successful implementation of technology. It ensures that the solution you have invested in will be as productive as possible, delivering the value you expect.

Your staff needs regular training to keep pace with rapidly evolving technologies as well. This investment will minimize your risk and ensure top productivity.

Flexible Schedules and Delivery

Classes are delivered either on-site or over the web to best meet your needs. Classes are scheduled on demand to better suit busy schedules and unique needs. On-site classes are led by a Scalable employee, not a subcontractor. Our web classes benefit from not having a class size limit and are more flexible in scheduling.

About Scalable

Founded in 2008 Scalable Software Limited is a leading supplier of innovative IT Asset Management software. Scalable's IT Asset Management solutions aim to assist IT Asset Managers and Software Asset Managers reduce compliance risk, minimize waste and cut costs.
